Application/Control Number: 09/672,323

Art Unit: 1723

Claims 1, 3-5, 7, 10-12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable 1. over U.S. Patent No. 3,623,611 (hereinafter referred to as Riley et al) in view of Dianorm GMBH brochure (hereinafter referred to as Dianorm brochure). Riley et al teach a microdialyzer comprising a body comprising two elastic sheets (16, 18) having a top surface with openings (26a, 26b) and a closed bottom surfaces and a membrane (20) sandwiched between two plastic sheets (16, 18) in vertical orientation perpendicular to a first plane and second plane inherently parallel to the first plane wherein clamps (22, 24) hold the elastic sheets together with backing plates (12, 14) wherein rigid plates (12, 14) and plastic sheets (16, 18) are usually made of materials which are fluid-impervious and nonreactive with the materials involved in the dialysis may be used (see figures 1-3; col. 1, line 36 - col. 2, line 30). Claims 1, 3-5, 7, 10-12 and 14 essentially differ in reciting that the body of device comprises the material polytetrafluoroethylene or Teflon. Dianorm brochure teaches that the dialysis cells are made of Teflon (see page 12-14; figure 2 on page 18). It would have been obvious to a person of ordinary skill in the art to substitute Teflon for the materials making up the body (16, 18, 12, 14) of Riley et al since Teflon is one of materials which are fluid impervious and nonreactive with materials involved in the dialysis.

Page 2

- 2. Claims 8-9, 13 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 3. Claim 39 is allowed. Note that the means for vertically separating the well is a dialysis membrane in the scope of claim 39.

Application/Control Number: 09/672,323

Art Unit: 1723

Applicant's arguments with respect to claims 1, 3-5, 7-17 and 39 have been considered 4.

but are moot in view of the new ground(s) of rejection.

The prior art made of record and not relied upon is considered pertinent to applicant's 5.

disclosure. Multi-Equlibrium Dialysis brochure by the Nest Group teaches a Teflon dialysis

cells. Journal of Pharmaceutical Sciences, Vol. 90, No. 5 (2001) teaches equilibrium dialyzers

and method.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to John Kim whose telephone number is (703) 308-2350. The

examiner can normally be reached on weekdays from 7:00 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Wanda Walker, can be reached on (703) 308-0457. The fax phone number for

official response after final action is (703) 872-9311, and the fax phone number for all other

official faxes is (703) 872-9310.

When sending a draft amendment by fax, please mark the paper as "DRAFT"; otherwise,

mark the paper "OFFICIAL". This will expedite the processing of the paper.

Any inquiry of a general nature or relating to the status of this application should be

directed to the Group receptionist whose telephone number is (703) 308-0651.
